

Anubhaw Mishra

Software Engineer (Fresher) — Java, OOP, Design Patterns, SQL

Pune, Maharashtra — +91 9939550413 — anubhawmishra002@gmail.com — LinkedIn — GitHub — Portfolio

Summary

B.E. Computer Science graduate with Honors in Cyber Security (Feb 2026, CGPA 7.50 / 10). Java is my core strength: four OOP pillars, Collections, exception handling, design patterns (MVC, modular and layered). Comfortable with SQL (MySQL, PostgreSQL, SQLite) and Git-based collaboration. Published AI/ML researcher (JETIR IF 7.95, IJSREM IF 8.448) with a deployed portfolio on Vercel. Based in Pune — zero relocation, available immediately.

Technical Skills

Java & OOP: Java (four OOP pillars, Collections, Exception Handling, File I/O, Generics basics), Design Patterns (Singleton, Factory basics, MVC), modular and layered architecture, SDLC ownership.

Databases: MySQL, PostgreSQL, SQLite. Comfortable writing queries, designing schemas, and using parameterized SQL.

Version Control: Git, GitHub, GitHub Actions, feature branches, pull-request workflow, code reviews.

Web (Good-to-Have): HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), REST APIs, Postman, JSON.

Cloud (Good-to-Have, Learning): AWS basics, deployment via Vercel and GitHub Actions CI/CD; Linux fundamentals.

AI / ML (bonus): Python, TensorFlow, Keras, CNN, OpenCV, NumPy, Pandas. Published researcher.

Other Languages: Python, JavaScript, C, SQL.

Practices: Analytical thinking, debugging, performance optimization, Agile / Scrum, Technical Documentation.

Experience

Web Developer Intern, Oasis Infobyte (Remote)

Jan 2023 – Feb 2023

- Built three responsive web apps using HTML, CSS, and vanilla JavaScript. Worked on reusable UI components and clean DOM event handling.
- Tested across browsers, did mobile responsiveness checks, and wrote pull-request descriptions with reproduction steps. Used Git feature branches and code reviews in an Agile workflow.

Projects

Online Examination System — Java OOP & Design Patterns

Java, Java Collections — GitHub

- Built a console-based exam platform in Java applying all four OOP pillars: encapsulated user state, separate classes for auth and exam flow, polymorphic scoring (positive / negative marking), abstracted control flow.
- Used `HashMap<String, Integer>` for O(1) credential lookup, handled invalid input with try / catch, and split the controller into small methods (`login`, `menu`, `startExam`) for clean, maintainable code. Designed for future extension to Spring Boot REST API.

Deepfake Detection System — High-Performance AI Pipeline (Published)

Python, TensorFlow, Keras,

OpenCV, SQLite, Tkinter — GitHub

- Built a CNN-based image classifier achieving 95%+ accuracy and 90%+ precision and recall, evaluated using accuracy / precision / recall / F1. Owned full SDLC: design, coding, optimization, deployment, documentation.
- Tuned model performance through preprocessing fixes (OpenCV normalization), Adam-optimized training, and iterative debugging via loss curves. Published in JETIR (Vol. 11, Issue 5, May 2024, IF 7.95) and IJSREM (Vol. 8, Issue 5, May 2024, IF 8.448, DOI: 10.55041/IJSREM34789).

Developer Portfolio Website — Live Deployment

- Built and shipped a responsive single-page site with Tailwind and vanilla JS. Tested across Chrome, Firefox, Safari, and Edge. Auto-deploys on every commit through GitHub Actions and Vercel.

Education

Savitribai Phule Pune University

2021 – Feb 2026

B.E. Computer Science, Honors in Cyber Security

CGPA: 7.50 / 10 (75%), No Backlogs

Bihar School Examination Board

2017 – 2019

Higher Secondary Certificate (PCM)

Research Publications

“Guarding Authenticity: Detection for Deepfake” — JETIR, Vol. 11, Issue 5, May 2024 (IF 7.95).

“Guarding Authenticity: A Deepfake Detection System” — IJSREM, Vol. 8, Issue 5, May 2024 (IF 8.448, DOI: 10.55041/IJSREM34789).

Achievements & Certifications

Led the Sponsorship Team at TechTonics 2024 (corporate partnerships, cross-team coordination). Presented the deepfake project at Ideazzz 2K24, SITS Pune.

Certifications: Full Stack with AI (React, Spring Boot, LLMs / GenAI) – Physics Wallah (ongoing). RDBMS PostgreSQL – IIT Bombay Spoken Tutorial. Python and C Programming – IIT Bombay Spoken Tutorial. Web Development (8 weeks) – Internshala. FinTech Engineering Virtual Experience – Goldman Sachs (Forage).
